

August's RBI data is out. Two things moved.

1

Big companies are slowing down.

Smaller ones are not. And the new money is going to services and NBFCs.

2

We're swiping more, but spending smaller.

Credit cards are becoming an everyday thing.

Big companies are slowing down

71 → 66.5

Dec 2024

Aug 2026

of every ₹100 lent to industry went to big companies

PART	OF CUT	GROWTH
Industry	—	18.2%
Large	66.5%	14.9%
Micro and Small	23.3%	23.0%
Medium	10.2%	31.8%

OF CUT = share of industry loans · GROWTH = vs a year ago

August alone: 67.3 → 66.5 in one month

1 · BANK CREDIT TO INDUSTRY

...smaller ones are not

How fast bank loans grew in a year

Mid-sized

31.8%

2× the big guys

Small

23.0%

still healthy

Big

14.9%

the slowest

1A · WHERE THE NEW MONEY WENT

The new money went to services, mostly NBFCs

Of every ₹100 of new bank credit this year:

+37.5% bank loans to NBFCs
banks lending to lenders

PART	GROWTH	NEW
Services	24.3%	—
▶ Non-Banking Financial Companies (NBFCs)	37.5%	47.8%
▶ Trade	20.1%	19.2%
Other Services	15.4%	13.9%

NEW = share of services' new lending this year

We're swiping more, but spending smaller

 AT SHOPS · GROWTH IN A YEAR

 ONLINE · GROWTH IN A YEAR

Swipes growing faster than rupees means each bill is getting smaller.

12.4 crore

credit cards, growing **10.3%** a year: the fastest in our data

More swipes, smaller bills.

The credit card looks less like a "big purchase" card now, and more like an everyday one: groceries, fuel, food orders.

COMING UP

The NBFC breakup. RBI has just started publishing it separately.
